INDEX TO PRINCIPAL CONTENTS OF VOLUME 168

JANUARY TO DECEMBER 1983

(First figure indicates issue, second indicates page)

A

A big share in the dyesprings market . . 2/3
All-British flame retardant treatment . . 1/5
Allied Colloids open US plant 10/5
Annual industry review and outlook . 1/13-21
Annual review of dyes and auxiliaries . 12/8-30
Applications and limitations of the continuous dyeing technique on compact pad-steam ranges 1/43, 2/38
Artos loop steamer in use worldwide . . 2/33
Autefa's automated roll-up device . . . 4/23
Automated colour dispensing 4/19
Auxiliaries, new 5/27, 12/21-30

B

Bayer bid for acrylic plant 7/5
Beacon 80 dye cycle controller system now working at Bulmer & Lumb . . . 1/35
Beau-Tech pad batch system described . 5/23
Biggest dyespring production unit in Europe 6/26
Bright future for Indian dyestuffs . . . 3/5
Brighter market for pigments in Europe . 4/4
British secretary-general of European associations 1/5
Burnley's invest in yarn-dyed colours . . 4/4

C

Carpet yarn dyeing 'ripe for development' 9/4
Central dye preparation station is a necessity for an efficient process cycle . 4/13
Centrifuge to replace pad mangle . . . 2/35
Chance of recovery in UK carpet sector . 7/17
Changing fastness requirements in carpet colouration 7/16
Chemical firm get technology award . . 5/9
Chinese buy stenters from Pegg-Whiteley 3/5
Coal-fired boiler reduces costs 8/12
Coal-fired fluidised bed combustion . . 8/9
Colour, design, style – the fashion influence 5/10
Colour fastness testing strips 1/39
Colour-matching service means quicker response to fashion changes 11/30
Colours clinched contracts at the Interstoff fair 12/7
Cold pad batch polymer shrink-resist finish for wool 6/28
Complications in colour measurement formulae 8/22
Continuous dyeing plant for sensitive fabrics 3/19
Conservation technology in textiles . . 10/23
Control system custom-built for Pegg-Whiteley 1/41
Conversion from high energy padding to low energy foam processing 5/15
Cotton 'Neddy' surveys the finishing sector 1/6

D

Developments in dyes and dyeing – 1982 and 1983 . . . . . 12/15
Developments in low liquor ratio rotary dyeing machines 2/17
Duke of Edinburgh becomes SDC patron . 6/5
Dye exhaustion control system 10/5
Dyehouse handling, storage and warehousing feature 4/13-23
Dyehouse services, water and effluent treatment feature 10/19-25
Dyeing system with 88 programmes . . 1/42
Dyer's Library . . 2/13, 4/29, 8/24, 9/54, 12/31
Dyesprings firm involved in takeover . . 9/5
Dyestuffs, new 5/26, 12/8-20
Dyestuffs sector needs new colour craze . 8/5

E

Economical drying processes 5/21
Effort and planning are rewarded by progress and profits 6/25
Employee-shareholders for Yorkshire Chemicals 5/9
Energy-saving first at Burlington Fabrics . 8/19
Energy-saving in dyeing and finishing . 7/19
Energy-saving research pays off 11/5
Evaluating hydrogen peroxide bleaching stabilisers 5/24
Expansion of worsted group's dyeing venture 4/3
Experimental designs by computers . . 7/6

F

Facts about pearl lustre pigments . . . 3/24
Financial moves to secure firm's future . 11/5
First European users of Japanese machine 2/30
Flame-retardant for natural & synthetic textiles 11/33
Foam application of a white permanent press soil release finish to polyester/cotton 5/13
Foam dyeing and finishing 5/13
Foam dyeing of tufted carpet 5/17
Foam finishing installation 2/21
Foam technology in carpet colouration . 8/21
Focus on a company – Bayer AG . . . 3/12
Follow example of prospering companies 1/21

G

Government take over Bombay mills . . 1/21

H

Halifax manufacturers slash heating bills . 8/18
Heat pump saves energy 3/22
Hoechst divide jobs to employ ex-trainees 11/5
Hoechst spend £1m. a day on research . 8/6
Hosiery sector will provide best business for UK dyers and finishers 8/8
Hosiery-trade interest in Rotex dyer/extractor from Pegg-Whiteley 2/30
Huddersfield dyers expand capacity to meet need for versatility 4/7

I

ICI Fibres chairman is new BTC president . 5/9
ICI Fibres launch new 36-colour yarn service 10/5
ICI pledge faith in the future of colours business and high technology 6/22
ICI research pays off with 'Impact' range . 6/15
Increased dye house productivity and efficiency using a match prediction computer 1/33
Innovation and technology – the key to the future? 1/13
Instruments, controls and computers . 1/31-42
ITMA preview 9/11-46
ITMA report 11/13-29

J

Jet machine popular in US 7/15
Jumbo hank dryer for carpet yarns . . . 7/15

K

Kuwait has important stake in Hoechst 2/3

L

Lack of formal training facilities puts emphasis on apprenticeships 2/6
Leeds graduates need jobs 2/6
Little interest in foam-based techniques outside the US 7/10
Low-cost colour control meter 1/37
Low liquor ratio jet machine from Spain . 5/25

M

Management Buy-Out Association formed 2/5
Management notes 4/25
Man-mades to overtake natural fibres by 1995 . . . . . 2/13
Master of Science course introduced . . 5/11
Milan ITMA was big business 12/3
Monomat oven for thermosolling . . . 2/36
More closures and job losses 3/7
Mr. Alan Lewis's bid to control IM approved 9/3

N

Narrow fabric transfer printer 6/21
New approaches to printing on polyester/cellulosic blends 6/11
New company take Obermaier name . . 4/5
New developments in the batchwise and continuous dyeing of polyester/cellulosic blends 6/29
New Dylan technology for machine-washable wool 11/35
New dyeing and finishing machinery . 2/15-36
New system for singeing mohair fabrics . 7/22
Novel wool dyeing system from Ciba-Geigy 7/8

O

Optimisation of dyeing of cotton and polyester-cotton fabrics using vat dyes . 3/20

P

Patents, new
Cold dyeing of carpets (GB2,006,289B) . 9/50
Continuous high-pressure steaming (GB2,000,818B) 2/41
Humidity control in steaming apparatus (GB2,005,319B) 4/28
Multi-dye effects on nylon carpet (GB2,007,725B) 4/28
Nylon carpet dyeing (GB2,002,822B) . 2/42
Wide-width heat transfer printing (GB2,006,278B) 9/49
Pattern cards, new 4/31, 5/26
Pegg-Whiteley's first anniversary . . . 10/26
Pennine in receivership 5/11
Portable Swiss moisture meter 1/39
Practicalities and problems in yarn package dyeing 1/29
Pre-heating cloth to avoid penetration problems 5/20
Pre-treatment range with hypochlorite bleaching 2/31
Printing method now applied to wool blends 10/6
Problem-free mercerising of tubular knit fabrics 3/18
Pumps have proved a sound investment . 10/23

Q

Quality of UK dyeing and finishing criticised 11/6

R

Rapid cold dyeing system from Snia . . 7/13
Recent developments in stenter design . 3/23
Reducing formaldehyde in textile finishing 1/42
Report on future of foam dyeing 7/13
Review of optical brightening agents . . 2/13
Richard Hough expand service 1/5
Rotary screen sampling table 6/17
Rotawash for fastness testing 2/27

S

Sandoz purchase US dye producers . . 2/7
Scottish dyers serve Leicester 2/3
Scottish spinners open dyehouse . . . 6/5
Screen frame tension gauge 6/15
SDC in excellent health and wanting new members 9/4
SDC views on colour measurement uniformity 7/7
Seminar on colour measurement . . . 11/34
Sericol Group bought by Burmah Oil . . 4/3

Shirley Institute aim for 'tactical survival' . 2/5
Sliding needlebar designs influential and pile weights are rising 10/27
Spinning disk system reproduces colours from numerical values 5/22
State aid available for modernisation . . 2/5
Steam accumulator solves textile firm's problems 8/15
Steam used to generate hot water for new Corah dyehouse 8/18
Stenter lubricants: higher performance reduces maintenance 10/19
Stenter mercerising process from Sandoz 7/6
Stock control of production materials and output 4/25
Support maintained for environmental work 8/5
Switzerland's contribution to colouration . 9/51

T

Technical advisory service established . 3/24
Technical information from Hoechst . . 4/31
Technology Group help UMIST staff to form new computer company 1/39
Testing unit's varied uses 5/21
Textile industry continues to be a major market for gas 8/17
Textile pigment printing system 6/17
The compatibility of reactive dyestuffs and its significance in textile printing . 9/47
The dyeing of yarn and loose stock for carpets using Hostalan dyes 3/21
The German dyeing and finishing industry 3/12-24
The impact of hot melt sizing on the future of high speed weaving 4/30
The mechanism of colour vision 7/20
The printing of half wool unions 6/18
The trials of tinted lenses and middle age . 5/10
Tipplers with long-reach chutes 4/21
Trends in wet and dry processing for 1983 2/27
Turbo steamer for use in printing . . . 8/17
Turnbull's of Hawick bought from receiver 2/3

U

UK finishers can now exploit new opportunities 11/31
UK man-made fibre output reduced . . 4/4
Unusual invitation to Roe Acre's 75th . . 1/5
US Government reports form textile study 2/13

V

Value-adding skills needed 3/6
Vat dyes – traditional chemistry used in modern dyeing practice 7/23
Versatility is the key to flatbed printing . 7/21
Viking install six-colour printer 2/23

W

Water pollution hits Indian towns . . . 1/7
Whitecroft make textiles pay 8/6
Why Vald. Henriksen developed the Jet 80 2/25
Wider range of uses for colour match prediction systems 1/31
Winder for cheeses or cones 2/23
Winding systems for dye beams . . . 4/23
Wira make up for lost levy funds . . . 8/6

Y

Yarn is coloured during extrusion . . . 4/5
Yorkshire Chemicals PLC company profile 10/12

INDEX TO MAIN SUBJECT HEADINGS

Auxiliaries 1/6, 5/27, 11/33, 11/35, 12/21-30

Bleaching 2/31, 5/24

Carpets *2/42, 3/21, 5/17, 7/10-17, 8/21, 9/4, 10/27*

Company profiles 3/12, 6/26, 10/12, 10/26

Dyehouse services 1/33, 4/13-23, 7/19, 8/9-21, 10/19-25
(including energy saving, warehousing and boilerhouse services)

Dyeing 1/29, 1/35, 1/43, 2/38, 3/20-21, 5/23, 6/29, 7/13

Dyestuffs *5/26, 6/15, 7/23, 9/47, 12/8-20*

Finishing 1/42, 5/13, 6/28, 11/31, 11/33, 11/35

Foam processing 2/21, 5/13-21, 7/10, 7/13, 8/21

Industry *1/6, 1/13-21, 2/3, 3/12-24, 3/7, 7/17, 8/8, 9/3, 9/51, 11/31*

Instruments, controls and computers 1/31-42, 5/22, 7/6

Machinery 2/15-36, 3/18-19, 3/23, 5/25, 7/21, 9/11-46, 11/13-29, 12/3

Patents *2/41, 4/28, 9/49*

Printing 6/10-21, 7/21, 9/47, 10/6
